In the early stages of the disease it will positively effect a cure in a few days without restriction of dist, or lear of exposure, and what is much more important, it never leaves t e parts subject to the troublesome gleets or weakness that occur so often after the use of other medictions.

In long protracted stages of the Gonorrhea, in obstinate Gleets, or a weakness of those organs it is without doubt the most effectual remedy ever discovered.

It will also be found a certain preventative against the disease if exposed, and in any case where there is cause to fear a few doses will arrest its progress and save any further trouble.
